### Work Details

Work Title: TreeMagic- Cypress

Creator: Mark Rabideau

Description: TreeMagic Cypress is a new lightweight browser plugin for wordpress. Install, configure, then double click any word, or select a group of words on the page. On mouse-up a small popup appears adjacent to the selected text that gives you instant access to define, expand and explore related resources. It does not replace or interfere with existing hyperlinks, but adds an instant and powerful reference compliment to all your texts, regardless of formatting and styles.

Publisher: Mark Rabideau

Contributors: Basheer Al-Ghazawi, Richard Strauss

Creation Date: 2008-02-16
